
The Ultimate Famicom Software Guide

-- version 2.0 --

Compiled by fcgamer, fcgamer26 [at] gmail [dot] com

<https://fcgamer.wordpress.com>

INTRODUCTION / AUTHOR'S NOTE:

When I first started collecting Famicom games, over three years ago, I had decided to chase after a complete set of the unlicensed software developed for the Famicom. I chose this goal partially because of my location, but also because it was a collection that few people had ever bothered to collect. Aside from a few deleted webpages available through archive.org and the incomplete sources at *Famicom World* and *BootlegGames Wiki*, there just wasn't much to go on. Hundreds of hours of searching through auctions around the globe, chatting with other collectors, and just going out and tracking down this obscure corner of Famicom collecting, and I had ended up compiling my own personal list to help aid with my own collecting goals.

Since those modest times, the scope of my personal collection has evolved into collecting everything Famicom, from Russian translations to educational cartridges, to official game packs and promos as well. As such, the documents which I use to keep track of my collection / game wants also evolved, and I felt it was time to compile it into a more user-friendly document.

Likewise, I would like to offer this document as a gift to all of my collecting buddies out there, who have helped sell / trade / gift me so many carts over the past three years. My collection wouldn't be where it is today without you guys, and without all of the interesting discussions about Famicom, I probably would have also lost interest by now if I were to go at it truly solo.

Finally, I hope that with an easy-to-use list in hand, other gamers / collectors will feel inspired to chase after more than just the standard 1051 official Famicom game carts. With such a wide array of software available, licensed, unlicensed, and stolen, I feel there is something here for everyone's area of interest. Happy gaming, and happy collecting! Until next time,

-fcgamer, May 2015

----- **SECTION I: CARTRIDGE-BASED MEDIA** -----

NINTENDO-APPROVED SOFTWARE:

The list that follows includes the entire Famicom cartridge software library, which was published with Nintendo's approval. As opposed to the Nintendo (NES) game releases in the West, Famicom games didn't receive golden seals of approval or licenses in that manner. The games that follow are the titles that Nintendo approved, however, and are the so-called licensed releases.

Game Title	ID Code	Developer / Publisher	C
'89 Dennō Kyūsei Uranai	IPC-J1	Jingukan	
\$1,000,000 Kid: Maboroshi no Teikohen	SFL-KP	Sofel

DATAACH GAMES

At the end of 1992, Bandai released the *Dataach Joint ROM System*, a special device for the Famicom that allowed one to swipe cards containing barcodes to interact with games. Bandai developed seven different games for use with their peripheral, and all of the games were housed in special “mini” cartridges. Included with most of the games were special cards that could be scanned, and finding complete sets of these cards can be difficult nowadays.

Game Title	ID Code	Developer / Publisher	C
Battle Rush: Build Up Robot Tournament		Bandai	
Crayon Shin-Chan: Orato Poi Poi		Bandai	
Dragon Ball Z: Gekito Tenkaichi Budokai		Bandai	
J-League Super Top Players		Bandai	
SD Gundam: Gundam Wars		Bandai	
Ultraman Club: Spokon Fight!!		Bandai	
Yu Yu Hakusho: Bakuto Ankoku Bujutsue		Bandai	

KARAOKE STUDIO

During the Famicom days, Bandai was one of the kings, as they always brought new, innovative products to market. In addition to things such as the Dataach Joint ROM System (mentioned above) and the Family Trainer mat, Bandai also brought KTV to everyone's Famicom via their product, *Karaoke Studio*. Karaoke Studio is an attachment that plugs right into the Famicom, via its cartridge slot. A microphone is built directly into the unit itself, so everyone can enjoy singing their favorite J-pop songs.

To provide additional fun and challenge to gamers and singers alike, Bandai would later release additional game cartridges, which plug directly into a special cartridge slot on the karaoke studio device. These games are listed below.

Game Title	ID Code	Developer / Publisher	C
Karaoke Studio		Bandai	
Karaoke Studio Senyou Cassette Vol. 1		Bandai	
Karaoke Studio Senyou Cassette Vol. 2		Bandai	

NANTATTE!! BASEBALL GAMES

Towards the end of 1991, Sunsoft had released a Famicom game titled Nantatte!! Baseball. Built into the game was a pin connector, which allowed gamers to plug in special mini game cartridges to upgrade stats and add more fun to Sunsoft's original game. The pair of mini carts would be released in early 1991.

Game Title	ID Code	Developer / Publisher	C
Nantatte!! Baseball: Kogame Cassette '91 Kaimakuban		Sunsoft	
Nantatte!! Baseball: Kogame Cassette OB All-Star Hen		Sunsoft	

KONAMI'S SPACE SCHOOL SERIES

The Konami Space School Famicom games are probably some of the most obscure items on the machine. Like the Datach and Nantatte!! Baseball carts listed above, the Space School carts do not plug directly into the Famicom machine; instead, the games are for use on Konami's Q Adapter. The games and adapter can transform the Famicom into a CAI machine of sorts. All of the software in the Space School series is educational.

Thus far, only six different games are known to exist, namely Space School Grade 4 First / Last Semester, Space School Grade 5 First / Last Semester, and Space School Grade 6 First / Last semester. The games are all related to the study of mathematics. Due to the mysterious nature of these games, it is possible that more titles may exist, possibly for the lower elementary grades.

Game Title	ID Code	Developer / Publisher	C
Space School Grade 4 (First Semester)		Konami	
Space School Grade 4 (Last Semester)		Konami	
Space School Grade 5 (First Semester)		Konami	
Space School Grade 5 (Last Semester)		Konami	
Space School Grade 6 (First Semester)		Konami	
Space School Grade 6 (Last Semester)		Konami	

PULSE LINE / PICTURE VERSION GAMES

The so-called pulse line games are actually the original fourteen Famicom games ever released. These fourteen games were all unified by a simple label design, which sported the game's name as well as a simple pulse line going from one side of the cartridge to the other. Nintendo would later rerelease these games (with the exception of Donkey Kong 3, Donkey Kong Jr. Math, Pinball, and Popeye English) with labels featuring characters from the games as opposed to the simple pulse line. Although the games are identical, other than the artwork, some may enjoy trying to collect both variants.

To do away with redundancy, for those collecting both versions of the games, the original (pulse line) versions can be checked off in the main game list, and this section can be used for the **picture version** carts.

Game Title	ID Code	Developer / Publisher	C
Baseball	HVC-BA	Nintendo	
Devil World	HVC-DD	Nintendo	
Donkey Kong	HVC-DK	Nintendo	
Donkey Kong Jr.	HVC-JR	Nintendo	
Golf	HVC-GF	Nintendo	
Gomokunarabe	HVC-GO	Nintendo	
Mah-Jong	HC-MJ	Nintendo	
Mario Bros.	HVC-MA	Nintendo	
Popeye	HVC-PP	Nintendo	
Tennis	HVC-TE	Nintendo	

TAIWANESE / HONG KONG RELEASES

Unbeknownst to many, the pulse line set of games were also distributed in Taiwan and Hong Kong, albeit in seemingly small quantities. Unlike their Japanese counterparts, these exported versions of the game have the words “Family Computer” written on the cartridge in English, as opposed to Japanese. Thus far I have only been able to personally confirm the existence of the following three games, though it is possible that the whole pulse line series was distributed in these regions.

Game Title	ID Code	Developer / Publisher	C
Baseball	HVC-BA	Nintendo	
Donkey Kong Jr Math	HVC-CA	Nintendo	
F1 Race ⁱ	HVC-FR	Nintendo	
Golf	HVC-GF	Nintendo	
Gomokunarabe	HVC-GO	Nintendo	
Pinball	HVC-PN	Nintendo	

IREM NON-LED RERELEASES

The original set of Famicom games released by Irem included neat LEDs built into the cartridge. When you powered up your Famicom, the LEDs would light up. Irem would later rerelease some of their original games, but in a bid for cutting costs, the LEDs were dropped. These rereleases are much harder to track down than their neater, LED counterparts.

Game Title	Developer / Publisher	Notes	C
10-Yard Fight	Irem		
Spelunker	Irem		
Sqoon	Irem		
Zippy Race	Irem		

PROMOTIONAL / CONTEST CARTRIDGES

These carts are some of the rarest of the rare, as far as licensed Famicom products are concerned. Just as Nintendo of America sponsored the notorious Nintendo World Championships contest in 1990, there were several contests and promotions in Japan, where special editions of commercial games were provided as prizes. Below you can see some of these contest games, as well as a few others which are rumored to exist.

Game Title	Notes	Developer / Publisher	C
Binary Land	Gold Cartridge	Hudson Soft	
Dragon Ball Z	Gold Cartridge	Bandai	
Dragon Ball Z II	Gold Cartridge	Bandai	
Gradius	Archimedes Version	Konami	
Hot Scramble	Gold Cartridge	Bandai	
Hot Scramble	Silver Cartridge	Bandai	
Kinnikuman Muscle Tag Match	Green Cartridge	Bandai	
Kinnikuman Muscle Tag Match	Golden Tag Cartridge	Bandai	
Meimon! Daisan Yakyuubu	Gold Cartridge	Bandai	
Obake no Q Tarou Wan Wan Panic	Present Version	Bandai	
Punch-Out!! Special	Gold Cartridge	Nintendo	
Rockman 4	Gold Cartridge	Capcom	
Uranoid II	Rumored	Taito	
Zombie Hunter	Present Version	Hi-Score Media Work	

In addition to the above mentioned games, there are also a few other sticker contest variations worth mentioning. A magazine and software publisher, Tokuma Soft, held contests relating to two of their games, Exed Exes and Lot Lot. With both games, if the player scored a high enough score in the game and then sent picture evidence to the company, Tokuma Soft would return the favor by sending a special sticker one could place on top of his or her retail version of the game. The following is a list of restickered carts to be looking for.

Game Title	Notes	Developer / Publisher	C
Exed Exes	Silver Members Sticker	Takuma Shoten	
Exed Exes	Gold Members Sticker	Takuma Shoten	
Exed Exes	Platinum Members Sticker	Takuma Shoten	
Exed Exes	Royal Members Sticker	Takuma Shoten	
Lot Lot	Silver Members Sticker	Takuma Shoten	
Lot Lot	Gold Members Sticker	Takuma Shoten	
Lot Lot	Platinum Members Sticker	Takuma Shoten	
Lot Lot	Royal Members Sticker	Takuma Shoten	

UNLICENSED FAMICOM GAMES:

In Japan, very few independent game companies had the guts to stand up against Nintendo by producing unauthorized products. Hacker International was one such company, which managed to publish about fifteen game cartridges, all filled with eight-bit nudity. Korean also had a small handful of Famicom game developers. The majority of the unlicensed products were ultimately born in Taiwan, though mainland China also had a few software development powerhouses.

So what exactly is my definition of an unlicensed game? To begin, the game was not authorized by Nintendo. In addition, the game was developed from the bottom up, that is, the game is original. Sometimes there is a fine line between “unlicensed” and “pirated”, since some developers coded games that illegally used the IP of Nintendo or another third party; however, instead of splitting hairs over definitions, from my perspective, if the game was developed from the ground up, we can throw it into the unlicensed category, even if some of the characters are used in an unorthodox manner.

Below is a fairly complete list of unlicensed Famicom games. There are times where things get a bit murky, as to which category the games belong, but this list should suit the needs of a lot of collectors.

WAIXING GAMES

Fuzhou Waixing Computer Science & Technology (aka Waixing) was founded during the early-mid 1990s in mainland China. For a span of over fifteen years, Waixing developed and published original RPGs for the Famicom, often inspired by popular Chinese novels and characters. In addition, Waixing also translated several popular Japanese Famicom games into simplified Chinese, allowing many on the mainland and in other Chinese communities to move beyond the Japanese language barrier present for non-Japanese gamers.

Due to the sheer number of game cartridges developed and published by Waixing, and the fact that these games are, for the most part, Chinese RPGs, I am listing these apart from the rest of the unlicensed Famicom games, as the vast majority of these games are of little interest to the average Western gamer. Initial print runs of the Waixing games will run perfectly fine in real Famicom hardware; however, later reprints will only work properly in Famiclones. In addition, most of the Waixing games received individual ID codes on the game packaging and cartridges. Judging from these numbers, it seems apparent that there are some games from Waixing's library, which have not been discovered as of yet.

NANJING GAMES^{lxv}

Like Waixing above, Shenzhen Nanjing Technology (aka Nanjing) is another game company located in mainland China. And like Waixing, Nanjing also has gained a bit of a reputation for developing and publishing over one hundred different unlicensed Famicom games, most of which are (once again) Chinese RPGs. Unlike the works produced by Waixing, however, many of Nanjing's releases are backports of popular Super Famicom games.

RUSSIAN GAMBLING SYSTEM^{lxvi}

Just like the state of Minnesota in the United States had developed and showcased a lottery Nintendo game, a gambling / lottery device was also developed in Russia for use on the popular Famiclone Dendy.

This special cartridge is called Bonza. According to an advertisement, one purchases a Bonza card with money loaded onto it and then inserts it into the top of the compatible Famicom software. From there, play the game, hoping to win cash prizes.

Game Title	ID Code	Developer / Publisher	C
Bonza			

SPICA'S SACHEN RELEASES

The digger you deep, the more you realize that you have only just scratched the surface. This old saying definitely matches my experience with the Famicom, and before I knew it, I was adding an additional subsection of games to the unlicensed section of this list.

I was first informed of the Spica's publishing antics a year or two ago, when an Australian member of Nintendo Age had chatted with me about the distribution of Sachen cartridges. He then showed me a startling find he had recently (at that time) made, which had come from a local sale: a small cache of HES Nintendo games as well as some Famicom goodies. The Famicom items were a combination of bootleg cartridges and Sachen games, the latter of which had been sold in Spica-branded cases. In addition to having their own Spica game cases, several of these Sachen games also had special Spica game labels as opposed to the regular Sachen labels.

For those that are wondering, Spica was a large game manufacturer / publisher during the heyday of the Nintendo. They distributed bootleg Nintendo-format cartridges into markets such as Indonesia, and apparently a lot of cartridges also ended up being distributed in Australia for a few years.

The following is a list of the special Sachen game cartridges. These carts were all distributed / "published" by Spica seemingly for the Australian game market, and as such, don't turn up very often. Unlike the Sachen games published / distributed by Ku Je and Hacker International, the Spica-distributed games don't seem to have any differences from the standard Sachen releases, aside from the Spica boxes and labels.

Game Title	ID Code	Developer / Publisher	C
777 Lucky Bingo		Sachen / Spica

Sidewinder		Joy Van / Spica	
Silent Assault		Joy Van / Spica	
Twin Eagle		Joy Van / Spica	

EDUCATIONAL CARTRIDGES

To me, this section of the “list” has to be the most notorious, for several reasons. For starters, most people aside from collectors will get little to no enjoyment from the games listed below. Most of these games were designed to teach children an elementary level of English. To make matters worse, a lot of these games were bundled with those pseudo-computer Famicom keyboard clones that were the rage several years back. This creates several problems for collectors and gamers alike.

To begin, there is often a compatibility issue. Many of the games listed below will only work on the keyboard clones that they were bundled with. Furthermore, for collectors that are trying to get a complete set of these games, it is often necessary to purchase the clone to obtain the game. In addition, many of these games do not have any sort of real “name” to refer to them by, which only makes it even more difficult to try to record all of the games and languages variations that exist. Finally, no one needs a dozen different keyboard Famiclones stashed away in his or her house. Tracking down these carts is for the serious collector only!

Note: Because many of these games have no “real” descriptive name to them, I will post pictures from the games themselves, which collectors can use to help reference their own collections to this list. Also, I know that my list is missing a lot of variations / cartridges, so please contact me if you have something that I don't have listed here. Thanks!

MULTICART-ONLY RELEASES

Sadly, some unlicensed games were only released on multicarts. Games that were released on multicarts only containing unlicensed games I listed in the unlicensed section; the games I am referring to here though, are those that were sprinkled throughout multicarts that also contained licensed Famicom games. Some of the games listed below were released on several multicarts, so I will not be listing the various carts on which these can be found. If there is a certain game you are trying to find, please send me a message, and I will try to let you know where I found it.

GAME ENHANCERS

People are generally familiar with the heated battle and delayed release in America concerning Galoob's Game Genie, a cheat device that allowed gamers to alter attributes in video games to assist gamers in difficult games, add new challenges, and explore hidden areas. Fewer people are aware that some game enhancers were also released for the Famicom.

Just like for the NES, Codemasters' Game Genie was also released for the Famicom format, although this time it would be published by Realtec, the company that had officially published many other Codemasters games on the Famicom.

BOOTLEG FAMICOM GAMES:

Alright so let's face it, everyone and their uncle were bootlegging Famicom games during the early 90s. Super Mario Bros., Tetris, Rockman...everything was being copied. Nowadays, most of these pirated games hold little value to collectors, existing as a minor footnote in a chapter of Famicom history. Despite this general lack of interest, however, there are some pirated Famicom games that are actually noteworthy, and they will be discussed below.

FAMICOM DISK TO CARTRIDGE PORTS

Around two-hundred different Famicom games were released on disks for Nintendo's Famicom Disk System device. Many of these games were only officially available on disk format, with some of the most famous examples being Super Mario Bros. 2 and Metroid. During the early 90s, some bootleg companies would port several of these games onto cartridge format. Although other companies may have also been involved, most of the ports were the work of two companies, namely Kaiser and Whirlwind Manu. Due to the durability of cartridges compared to disks, and convenience factors, these cartridge ports are highly sought today.

NES-EXCLUSIVE TO FAMICOM GAME CARTRIDGES

It is quite common for Western gamers to eagerly check out pictures and read about the latest gaming gems being released in Japan. Sadly, more often than not, Japan would receive many hidden gems, which never made it to Western shores. Although not as common, around three hundred different Nintendo games never managed to find release in Japan. Over half of these exclusives would be pirated though, appearing on bootleg Famicom cartridges distributed primarily in Eastern Europe, South America, and parts of Asia. So for gamers wanting to play games such as Talespin or Flintstones 2 on their Famicoms, they can check out the other exclusive NES games that only appeared on Famicom via unofficial means.

ARABIC TRANSLATIONS

During the Famicom's heyday, one game (Captain Tsubasa II) was unofficially translated into Arabic. The translation was most likely backed by Rinco / Ramar International, which was involved with a large portion of the distribution of Famiclones and games in the Middle East. As far as I know, the Captain Tsubasa II translation was only available on multicart format.

Game Title	(Original) Developer / Publisher	Notes	C
Captain Tsubasa II	Tecmo	Multicart only	

RUSSIAN TRANSLATIONS

Many Famicom games were also translated into the Russian language before being marketed in the Dendy regions. Although the original batch of Russian language carts are quite scarce to come by these days, it seems as though a new batch of modern releases are still available in Russia to this day.

ENGLISH VERSIONS

The following games are English releases, put on Famicom cartridges by pirate companies. The original source code for these games is the American release, hence the reason the language of these games is in English. Unlike the games listed above, official Japanese versions of these games were released on the Famicom in either disk or cartridge format. I know that I am missing a lot of titles from this list, but they will be added as they are confirmed.

DATACH NON-CARD ADAPTATIONS

Pirate companies drew their games from many sources, be it Japanese releases, American-exclusives, or even unlicensed games. One such source from which bootleggers decided to steal games was from the Datach Joint Rom System games. The games were hacked to be playable without the barcode reader or the cards, which are needed to play the (legit) Datach releases.

Game Title	Original Developer / Publisher	Notes	C
Dragon Ball Z: Gekitou Tenkaichi Budoukai	Bandai		
Yu Yu Hakusho	Bandai		

GAME HACKS:

Hundreds, if not thousands, of Famicom games have been released with hacked versions. The most common (and uninteresting) hacks were simple bootlegs; pirate companies would take stolen software and then remove the copyright notices on the title screen. Such minor hacks as those are not worth mentioning, with few exceptions (i.e. when a prominent company made such a hack, it can be a bit more interesting).

The next level of hacks are those that are simple sprite hacks. Still rather boring, it can be sort of neat to see how a Tiny Toons game was turned into a Mario game, or that Wacky Races was reused as a Lion King game. Once again, there are so many game hacks like these, that I will only list a small sampling, which I know to exist.

Finally, the best hacks are those that take an old game and give it a new makeover. Examples would be a Harry Potter game, which takes the Wacky Races game and rearranges the levels, changes some of the sprites, etc. Although these games are just hacks, they add a new level of enjoyment to previous classics, and are thus fun to own.

SIMPLE GAME HACKS

These are the boring game hacks mentioned above.

Hack Name	Original Game Name	Availability	Notes	C
1944	1943	Single Cart		
1945	Sky Shark	Single Cart		
Adventure Malie	Adventure Island	Multicart Only

Top Gun III	Flight of the Intruder	Single Cart		
Toy Story II	Bomberman	Multicart Only		
Turtle Ninja 5	Toxic Crusaders	Single Cart		
Wario Land II		Single Cart		

SUPER MARIO HACKS

Everyone knows Mario. He is an iconic figure, who loves to explore unsettled islands, practice Kung Fu like Jackie Chan, hangout with the Tiny Toons, etc. Well none of this is canon in the real Super Mario Bros. Story, though, unless you believe what the pirates are trying to tell us. Either way, Mario has been hacked into many games, and to add to the excitement, a lot of these games are numbered (i.e. Mario 4, Mario 5, etc).

Hack Name	Original Game Name	Notes	C
Mario IV	Armadillo		
Super Bros. 5	Super Mario Bros. 2	English version	
Super Bros. 6	Tiny Toon Adventures	English version	
VII (Grand Dad 3M)	Flintstones: Rescue of Dino and Hoppy	English version	
Super Bros. 8	Don Doko Don 2		
Super Mario World 9	Adventure Island 2		
Super Bros. 10: Kung Fu Mari	Jackie Chan's Action Kung Fu		
Super Bros. 11	Adventure Island 3		
Mario 12	Yossy no Cookie		
Super Brothers Mario 13	Saiyuuki World 2

Super Mario Bros. (w SMB2J Graphics)	Super Mario Bros.	Multicart-Only	
Super Mario Bros. 2 (w SMB Graphics)	Super Mario Bros.	Multicart-Only	
Fancy Mario	Super Mario Bros.		

COMPLEX HACKS

These games may be hacks of other games; however they have all been reskinned or redesigned to the point where they seem like new titles.

Many of the hacks listed below were created by Inventor, a Chinese company that had included these games with Famiclones of the 21st century. Please note: other hacked games by Inventor are also known to exist, but the ones listed below are the only ones I have ever found on actual cartridges.

Hack Name	Original Game Name	Availability	Developer / Publisher	C
Aether Kavass	Choujikuu Yousai Macross	Multicart Only	Inventor	
Bandits	Donkey Kong 3	Multicart Only	Inventor

FAMICOM YAROU CARTRIDGES

The Famicom Yarou game cartridges are a series of three game cartridges, each containing hacked versions of classic Famicom games. Many of these games were built into various Famiclones, and three cartridges (containing seven games each) were also released. The contents of those carts can be seen below. As can be seen above, the games on the Yarou cartridges were mostly hacked by Inventor.

Cartridge Name	Game 1	Game 2	Game 3	Game 4	Game 5	Game 6	Game 7	C
Yarou Vol. 1	Boat Race	Roge Brer	Bomb	Aether	Penguin	Van-I	Conte Energy	
Yarou Vol. 2	Frog Prince	Bounce Ball	Spar	Cobra of Sky	Rescue Kuck	Bounce	Surface Fire	
Yarou Vol. 3	Ladangel	Scoring	Tennis	Maze	Bandits	Mars Man	Space War	

FIGHTER HACKS

A lot of unlicensed fighting games had been developed for the Famicom, and Yoko / Cony Soft was one of the main publishers. They would sometimes hack their own games to create other game releases, and those are all listed on the unlicensed list above (the official hacks all had part numbers). The list below lists a lot of the fighting hacks that I have been able to confirm. These games are hacked versions and do not seem to be officially endorsed by the makers.

On another note, there are some games missing from this list, if ROM lists / screenshots are to be believed. Since anyone can hack a ROM image and throw it on the Internet, I will only add games to this list once I can confirm their existence, either personally, or from other trustworthy sources.

Game Title	Original Title	Original Developer / Publisher	Availability	C
City Fighter IV	Street Fighter II: World Warrior	Yoko Soft	Single Cart	
Dragon Ball Z III	Dragon Ball Z 2	Hummer Team / JY Company	Multicart	
Fighter V	Super Fighter III	Unknown	Multicart

Super Fighter II'	Street Fighter II: World Warrior	Hummer Team / Yoko Soft	Single Cart	
Yuu Yuu Hakasho 97 V	Yuu Yuu Hakusho Final	Yoko Soft	Single Cart	

ODDITIES:

There is some software that just doesn't fit in any of the aforementioned categories, due to the limited information known about it. These games will be listed below, and my personal theories will follow.

HYUANDAI ZELDA II: LINK'S AWAKENING

As most of us are already aware, in Japan *Zelda II: Link's Awakening* was available exclusively on disk format. A small supply of *Zelda II* Famicom cartridges has been found in Korea. These games seem to have been distributed by Hyuandai, Nintendo's official distributor of games in South Korea, which suggests these may have been official game carts. Furthermore, I have been told that the game uses official Nintendo chips. The actual game content is the NTSC (English) version of *Zelda II: Link's Awakening*, the same game that had been sold across the USA.

This game cartridge also came packaged in a nicely-designed box, and a high-quality manual was also included. The box is a bit odd, however, since it lists the game as "A Link to the Past" as opposed to using the game's real title. The cartridge's shell is also of pirate-quality, being quite generic. In addition, the Famicom was never officially distributed in Korea, so it seems odd that an official Nintendo product would be sold for a format that Nintendo didn't officially market in that region.

It is possible that Hyuandai put this game together with extra chips they had from when they were making their official NES releases, making this a semi-legitimate release. On the other hand, the cart may just be a nice bootleg. A Korean Legend of Zelda cart with a similar cartridge design has also been found, which may be of the same stock as the Zelda II carts.

Zelda II: Link's Awakening			

NITRA'S TAITO GAME RELEASES

Moving from Korea to Taiwan, we also have some interesting releases going on. A Taiwanese semiconductor company, Nitra, released two Famicom games, *Time Diver Avenger* and *Queen Bee V*. Both games came with boxes, and both titles were also developed by Taito. *Time Diver Avenger* is a game that never saw the light of day in either Japan or the West, despite being completed and having extensive coverage in Nintendo Power magazine. *Queen Bee V* is a title screen hack of *Insector X*, a Japanese game that never made it to the West.

The majority of games coming out of Taiwan are either bootlegs or unlicensed; however, the story regarding these two is a bit stranger. It is a bit odd that Nitra would exclusively steal Taito games (including an unreleased game!), and then only bother to release two different titles. Likewise, the company bothered to make boxes for these games, something a lot of companies didn't bother with. I personally believe that Taito may have had some special licensing agreement with these two games, sort of like how BIC handled the publishing for Videomation on Famicom (unlicensed), yet when the game was released in the West on Nintendo, it was published by THQ (a licensed game company).

Game Title	Developer	Publisher	C
Queen Bee V	Taito	Nitra	
Time Diver Avenger	Taito	Nitra	

KIDDY SUN IN FANTASIA

Kiddy Sun in Fantasia is a hack of the first Adventure Island game, which has been circulating around for awhile. This hack of Adventure Island features some different music and sprites, and also the level order has also been slightly rearranged, when compared to the original Adventure Island game. Furthermore, the game is allegedly based off of a cartoon show of sorts, or so I have been told, but I have been unable to personally confirm this.

At first blush, it seems as though Kiddy Sun is just a bootleg hack of Hudson's Adventure Island. The game is not so different from the original, and the company that published it was based in Taiwan. On the other hand, I have always felt that this game was a bit more special than that.

Kiddy Sun in Fantasia was published by Era Tech, a company that is actually part of ERA Communications, a large multimedia company that has been involved with Internet, multimedia distribution, satellite TV broadcasting, etc. With that being said, it seems that this game was somehow distributed as a promotional or something, somehow relating to this large media company and (obviously) the TV show they were airing at the time. It sort of makes sense that a media company would want to get involved with the gaming industry in one way or another, back when the Famicom was the “in” thing. This still doesn't answer the question as to whether this was a licensed hack or not, since as we all know, some very prominent companies were involved with game piracy in the distant past.

The other thing that is known is that Hudson Soft had a Taiwanese / Hong Kong division during the late 80s and early 90s (known as Hudson-Era), distributing a very limited number of games for the PC Engine. It is unknown whether the name of this company is just a coincidence or not, and also whether Hudson licensed the game to Era Tech, though it doesn't seem to be beyond the realm of reality. No matter what the exact story is, Kiddy Sun in Fantasia is an older, rare hack of a popular game, and as such, it is highly sought after.

Kiddy Sun in Fantasia	Hudson Soft	Era Tech	

HOME BREW GAMES:

To draw the line between a homebrew game for the Famicom or Nintendo Entertainment System (NES) can be quite a messy venture; since a large portion of homebrew games have only been made available via fan-made cartridges, the difference between Famicom and Nintendo becomes blurred. The following homebrew games were specifically developed with the Famicom in mind, however, and some of them (Mr. Splash! and Kira Kira Star Night) have had an official run of carts produced.

----- **SECTION II: DISK-BASED MEDIA** -----

In the beginning of 1986, Nintendo would release a peripheral to go along with their Famicom machine, the Family Computer Disk System. At the time of its release, the Family Disk System was an exciting product. The usage of disks as opposed to cartridges opened up many opportunities for development companies and gamers alike. Cheaper production costs and the ability to save games directly to the disk were both advantageous. Likewise, gamers also received some of the benefits from this new Nintendo format.

Disk Fax Kiosks allowed gamers to submit their best gaming scores to Nintendo. This opened up the door for many contests and prizes, where gamers would compete for top scores and glory. Disk Writer Kiosks were even more exciting, since for a nominal fee, game players could write new games over the old titles, which they were finished playing. At only a fraction of the cost of purchasing a brand new game disk, one can certainly see the appeal of such a device.

Unfortunately, the Famicom disk situation has become somewhat of a nightmare for collectors, almost thirty years later. The Famicom Disk System itself is prone to failure. The belts often get stretched or break, and need replaced. The magnetic head becomes unaligned, and the list of problems can go on forever.

The disks themselves can also be problematic. As mentioned above, games often got rewritten, so it is all-too common where a collector purchases one disk, and it turns out another game has been thrown on top of the original title. Then there are situations where the disk system will spit out cryptic error messages, and the only thing left to do is to eject the disk, reinsert it, and pray that things will go smoothly. The disk played fine last week, but you must have looked at it funny as it sure isn't reading properly this time. Eject, insert. Eject, insert. Again and again and again.

The Famicom Disk System was a pretty neat device for its time, and it is definitely an interesting part of Famicom history. The reliability of the machine and its software is entirely different story, though, so there are sure to be some hiccups in the road for those that are trying to obtain all of the games on the following lists.

NINTENDO-APPROVED SOFTWARE:

The list that follows includes the entire Famicom disk software library, which was published with Nintendo's approval. As opposed to the Nintendo (NES) game releases in the West, Famicom games didn't receive golden seals of approval or licenses in that manner. The games that follow are the titles that Nintendo approved, however, and are the so-called licensed releases.

PROMOTIONAL / CONTEST DISKS

Just like with the cart-based software, Nintendo held some contests and also released some promotional disk-based games as well. Below are the titles that exist.

Game Title	ID Code	Developer / Publisher	D
All Night Nippon SMB	ANN-NSM	Nintendo / Nippon Broadcasting	
Golf Japan	FSC-GSJE	Nintendo	
Golf US	FSC-GSUE	Nintendo	

WAKUSEI ATON GAIDEN

The story behind Wakusei Aton Gaiden is interesting. The game was developed by Kokuzeichou, the Japanese tax agency, with the intention of presenting the information about the Japanese economy to gamers via a game. Wakusei Aton Gaiden is a shooter of sorts, and throughout the game, the gameplay will be interrupted as the player is asked questions about the Japanese economy.

Game Title	ID Code	Developer / Publisher	D
Wakusei Aton Gaiden	Unknown	Kokuzeichou	

UNLICENSED FAMICOM DISKS:

Although the Famicom Disk System's library is quite small, about 1/5th of its meager game selection is comprised of unlicensed porno titles. To make matters even more interesting, some of the disk-based adult titles contain more explicit material than the material that made it onto the 18+ game cartridges, with *Alien Battle* immediately coming to mind. Then there are such interesting titles as *Body ConQuest*, an RPG 18+ parody. All of the unlicensed Famicom disks are adult-themed.

BOOTLEG FAMICOM DISKS:

One of the major problems Nintendo faced with its disk-based peripheral was the ease, at which unauthorized copies of the games could be made. Bootleg disks were commonplace, and everything was copied: official Nintendo products, unlicensed games, etc. Nothing was excluded from the hands of the pirates. Even cartridge-based games ended up appearing on the Famicom disks. Due to the large number of disks being copied, the only items I feel are worth mentioning are a few of the hacks.

MARIO CASTLEVANIA

Mario Castlevania is basically what the name implies, a mix of Mario and Castlevania. In reality, the game is just a pirated copy of the original Castlevania game, with a Mario sprite hacked into the game, replacing Simon Belmont. This is one of the better known Famicom Disk System hacks.

Game Title	Original Game	Notes	D
Mario Castlevania	Castlevania		

MARIO ZELDA

Mario Zelda is another simple hack, this time the game of choice being Super Mario Bros. Link is hacked into the game, and some of the text has been edited (i.e. "Welcome to Gold Lion!" appears when entering the warp zone). This is another basic game hack, but it is pretty cool given the time it was made.

Game Title	Original Game	Notes	D
Mario Zelda	Super Mario Bros.		

----- **SECTION III: NOTES & COMMENTS** -----

First and foremost, I would like to thank all of the wonderful people over at Famicom World for their knowledge. Without it, a gaming list of this scope would never have been possible. In addition, that website has been of incredible assistance to me, as the information about the licensed Famicom games has mostly been taken from there, though it has been heavily modified as well to remove some errors, fill in missing data, etc.

Likewise, the information about the unlicensed Nanjing games is based on the information present on the Bootleg Games Wiki, although once again, edited and updated to be of better assistance to the end user.

Most of the information regarding the licensed games has been crosschecked with numerous sources, including my own personal collection. With that said, there are bound to be errors discovered in these sections and others at a later time. If something looks problematic, or you have some comments to make, please send me a message to the following address, so I can correct it: fcgamer26 [at] gmail [dot] com. Thanks.

The information about the Russian games was mostly obtained from CaH4e3's page as well as ROM listings, and the rest of the content contained within this document was personally compiled by myself, after searching dozens of websites, auctions, game collection photos, and talking with dozens of Famicom collectors / gamers over the past three years. Thanks a lot everyone for the assistance.

For more in-depth details about some of the games, please check out the endnotes. :)

Although this journey is about to close, I would finally like to take the time to recommend the following websites, as they all contain interesting gaming content:

- i The Taiwanese version of F1 Race is quite special. The Japanese version of F1 Race was released exclusively as a picture-version cart. The Taiwanese version, however, was released as a pulse-line version. That makes this version of F1 Race especially interesting to collectors as well as those attempting to get a complete pulse-line collection.
- ii The following games appear on the 15 in 1 Hummer Team cartridge: The Legend (a hack of Street Fighter IV), The Hummer (a hack of Somari), Pink Jelly, Hacker, Heroine (these two games are hacked versions of Titenic), The Duck, The Egg, as well as several other hacked versions of the aforementioned games.
- iii A large portion of the original NTDEC games were rereleased on the Asder 20 in 1 multicart. Even better, many of these games would be tweaked, such as Magic Carpet 1001, which made the games easier to play. The games included are as follows: Magic Carpet 1001, Skate Boy, Cosmos Cop, Bookyman, Balloon Monster, JP Ronny, Adam & Eve, Porter, Go! Benny!, Tank, Benico, Dream Fighter, Master Shooter, Top Hunter, as well as several of the mini games from Pokey.
- iv The games on Micro Genius's 3 in 1 Super Gun cartridge are as follows: Clown, Snake Charmer, and Shooter.
- v This is the infamous Caltron 6 in 1 cartridge, only on Famicom format. The games on the cartridge are Cosmos Cop, Magic Carpet 1001, Balloon Monster, Adam & Eve, Porter, and Bookyman. All of these games were also released in single-cartridge format on Famicom.
- vi The games included on Micro Genius's 6 in 1 cartridge are as follows: Clown, Snake Charmer, Shooter, F15 City War, Poke Block, and Volleyball.
- vii The fifth Asang cart includes the following unlicensed games: TWXMZ, Five Days, Highway Racing I, Table Tennis, Baseball, Burrow Explorer, Boxworld, and Fish War.
- viii The fourth installment of the Asang multicarts contains the following releases: Shock, Hitting Mices, Highway Racing I, Robot, Shooting Ballons, Boxing Wrestle, Fish War, and Table Tennis.
- ix This is the third in a series of multicarts published by Asang. The games on this cartridge are as follows: Happy Biqi, Robot, Baseball, Dig Mines, Fish War, Play Cards, Edacity Snakes, and Five-Days.
- x This is the next in a series of multicarts published by Asang. The games included on this cartridge are as follows: Dragon Knife, Highway Racing I, Boxing Wrestle, Boxworld, Burrow Explorer, Hua Rong Dao, Gift Xmas, and Apple Chess.
- xi This is the first of (at least) six different Famicom multicarts published by Asang. The games contained on this cartridge were mostly developed by Waixing and Nice Code, and were developed around 2005. Some of the games are also available as single-cart releases, though not all of them. This pack includes Golden Axe, F-22, Guard Farm, Police Skill, Desert Gunman, Hitting Mices, Shooting Ballons, and Table Tennis.
- xii The final cartridge in Asang's unlicensed multicart series contains the following games: Journey to the West, Boxworld, Dig Mines, Hitting Mices, Hua Rong Dao, Edacity Snakes, Shooting Ballons, and Gift Xmas.
- xiii Two versions of Hummer Team's Aladdin exist. The rarer version is the so-called full version of the game. It differs from the more common cut version due to the fact that the full version has some extra animations, and also does not suffer from a music glitch at the end of stage one.
- xiv I would personally classify Bai Bai Dino as a tech demo or something of the like, as opposed to an actual game. In future versions of this list, Bai Bai Dino's placement may be changed. There is little to the game itself, and it may have been developed for use on some obscure Famicom keyboard clone or the like.
- xv BB Car is essentially the same as Hwang Shinwei's Me Hun Che. The major difference between the two games is that the title screen has been changed. The BB Car version of the game is much harder to find than the Me Hun Che version.
- xvi Chinese Kungfu would be the last game developed by Joy Van, before the Sachen / Joy Van merger. The game's package marks it as a Joy Van release; however, the game only made it to retail via Sachen. A Joy Van-published prototype does exist though.
- xvii Although I am not a huge fan of the game Creatom (I cannot really understand how to play the game, even after reading the instruction manual), I feel that this is one of my favorite unlicensed game packages for the Famicom. Sold in a large package (reminiscent of the old big box PC games of yesteryear), the Famicom version of Creatom included a large instruction manual, a puzzle sheet, and around 40 or 50 cardboard game pieces. Never before have I seen so many goodies included with an unlicensed product.
- xviii Fantastic Adventures of Dizzy exists on the Famicom with two different artwork variations. Since this game was published by both Realtec and BIC, it might be a situation where one artwork version corresponds to one company's release; however, since Realtec and BIC were basically the same company, there was a lot of game cartridges that have BIC printed on the cartridge, and Realtec printed on the box. Therefore it is really hard to confirm this for sure.
- xix There are two versions of Fighting Hero. One of the versions (presumably the first release) credits the publisher

- on the title screen as “Maga Soft”, whereas the second version fixes the spelling error and lists the publisher as “Mega Soft”. The Maga Soft version seems to be slightly harder to find.
- xx Micro Genius's 4 in 1 cartridge include several different games, which were originally developed by Idea-Tek. The games included are as follows: Puzzle, F15 City War, Poke Block, and Volleyball.
- xxi Although limited in capability, the Futbol / Boxe Virtual is one of my favorite unlicensed Famicom games of all time. Published by Dynacom, the game cartridge has a sensor in the back, which detects the signal from a wrist device included with the game. This allows one to play a motion-detection soccer and boxing game on the Famicom.
- xxii Two different artwork variations exist for Gaiapolis.
- xxiii I could have sworn that two different labels, each with different artwork, exist for the General's Son; however, when trying to double check this, I cannot seem to find any pictures of the second version of the game. So for now the second version can just be considered a rumor.
- xxiv Also known as The Dragon, Lee Dragon features Bruce Lee. The game itself is a poorly-designed beat-em-up, but of interest is the fact that the game was translated into Arabic. This was because the publisher, Ramar International, distributed their products primarily in the Middle East.
- xxv Magic Bubble seems to have had two official releases. The first release (in 1991) was distributed around Taiwan and Asia, whereas the game also received a second release (with different artwork) in 1995. The second release circulated around Eastern Europe and Russia.
- xxvi The Ku Je Academy Sachen games may at a later date be moved into their own section, like the Spica Sachen games, but for now they will stay on the main page. It is unknown who Ku Je Academy really were, and how many Sachen games they published and distributed in Korea; however, at least two games were published by Ku Je: Magical Mathematic and Olympic IQ. The title screens for these games were edited, making these titles interesting to collect.
- xxvii The original Mahjong Trap game was developed and published entirely by Joy Van. This version of the game feels unpolished compared to the second release (more information at note xxvi below).
- xxviii This is the updated version of Mahjong Trap. Published by Hacker International in Japan, the new Mahjong Trap would be published by Thin Chen (Sachen) in Taiwan and elsewhere. This game is based on Joy Van's Mahjong Trap, but the graphics and music have been updated and improved.
- xxix This game was released in two different style boxes: one was a large box (which had a bootleg copy of Puzznic packed with it), and the other release had a normal-size box.
- xxx Me Hun Che is essentially the same as Hwang Shinwei's BB Car. The major difference between the two games is that the title screen has been changed. The BB Car version of the game is much harder to find than the Me Hun Che version.
- xxxi Micro Motion is the same game as Micro Machines.
- xxxii Millionaire was released with two different artwork designs. The internal game play hasn't been altered though.
- xxxiii Like Millionaire above, Millionaire II was also released with two different variations. The one label titles the game as Millionaire II, whereas the other label lists the game as Zhong Guo Da Heng. As with Millionaire above, the two games are identical.
- xxxiv Please see note xxiv for more information about the Ku Je Academy Sachen games.
- xxxv Padillon Gais is an interesting cartridge. The label suggests that it is an uncensored version of Incantation (released as Papillion Gals by Hacker International in Japan). The label is misleading though, as all copies of the game found thus far are actually just mislabeled copies of Thin Chen's Mahjang Companion. It seems that Sachen may have considered publishing Papillion Gals in Taiwan and elsewhere (much like they did with the adult version of Pyramid), but then decided against it after already printing up labels.
- xxxvi Affectionately known as the Pegasus Golden 5 in 1, after Poland's Famicom clone Pegasus, this game cartridge includes the following games: The Ultimate Stuntman, Bignose the Caveman, Bignose Freaks Out, Micro Machines, and The Fantastic Adventures of Dizzy.
- xxxvii Two different versions of Penguin and Seal exist, and the easiest way to distinguish the versions is via the different artwork used on the boxes, game labels, etc. Although the two games are basically the same, they feature different title screen graphics and music, etc, hence the duplicate entry on the collector's list.
- xxxviii The Pokemon 4 in 1 cartridge contains the following original games: Picaclick, Pacman, Picaslot, and Picadance.
- xxxix Popeye 2 is a hack of Hummer Team's Aladdin, only the game has been altered to include Popeye.
- xl Power Rangers IV is an updated version of Hummer Team's Power Rangers III game.
- xli This version of Pyramid I contains the same code as the version of Pyramid I published by Hacker International in Japan. This is the uncensored version of the game, containing 8-bit nudity. This and the censored version

- were both published in Taiwan by Sachen.
- xlii The games included on the Quattro Adventure cartridge are as follows: Boomerang Kid, Treasure Island Dizzy, Linus Spacehead, and Super Robin Hood.
 - xliiii The games included on the Quattro Arcade cartridge are as follows: Boomerang Kid, Go! Dizzy Go!, Super Robinhood, and Soccer Simulator. Interestingly enough, the box for this game erroneously lists the compilation as "Quattro Adventure".
 - xliv The third chapter of the "Quattro" series, the games included on this cartridge are as follows: Baseball Pros, BMX Simulator, Soccer Simulator, and Pro Tennis.
 - xlv This is an updated version of Rex Soft's Samurai Spirits game.
 - xlvi Two versions of this game exist. The rarer (first edition) included a box, whereas the later print run (which may have been unauthorized) is much more common to find and did not come with a box.
 - xlvii Silent Assault is the same game as Raid, only with an English title screen.
 - xlviii Somari was released with two different boxes: the one box was about the same size as a Famicom cartridge, whereas the other box was larger in size.
 - xlix Street Hero is the same game as Sachen's Samurai Spirits. This game would later be updated and released by Rex Soft.
 - l The Super 4 in 1 cartridge contains the following original games: Space Fight of Gun, Abyss of Gloom, Fantasy of Gun, and City Adventure.
 - li The games on Sachen's Super Cartridge V. 1 are as follows: Bingo 75, Lucky 777, Honey Peach, and Chess Academy.
 - lii The games on Sachen's Super Cartridge V. 2 are as follows: Hidden Chinese Chess, Omnibus Hearts, Fan Tan, Chinese Rummy, Max 2, Ghost Buster, 99, Change Around, and Fortune Telling (in both Chinese and English versions).
 - liii The games on Sachen's Super Cartridge V. 3 are as follows: Jovial Race, Little Red Hood, Twin Eagle, Silent Assault, Super Pang, Mine Sweeper, Mine Sweeper II, and Mine Sweeper III.
 - liv The games on Sachen's Super Cartridge V. 4 are as follows: Master Chu and the Drunkard Hu, Metal Fighter, Galactic Crusader, Auto-Upturn, Magic Cube, and Super Pang II.
 - lv The games on Sachen's Super Cartridge V. 5 are as follows: Penguin and Seal, Middle School English, Pyramid, Magical Mathematics, Strategist, Olympic I.Q., and Chinese Checkers.
 - lvi The games on Sachen's Super Cartridge V. 6 are as follows: Colorful Dragon, Pyramid II, Pipe V, Millionaire, Dancing Blocks, and Locksmith.
 - lvii The games on Sachen's Super Cartridge V. 7 are as follows: Sidewinder, Happy Pairs, Tasac, and Silver Eagle.
 - lviii The games on Sachen's Super Cartridge V. 8 are as follows: Final Combat, Worm Visitor, Frog Adventure, and Magical Tower.
 - lix The games on Sachen's Super Cartridge V. 9 are as follows: Challenge of the Dragon, Rockball, and Popo Team.
 - lx Like Hummer Team's Aladdin, two versions of Super Lion King exist, namely a much rarer full version and then the so-called cut version. The full version of the game includes a bug toss game. Halfway up stage one, veer to the left and pick up the bug sitting on the bush. After you defeat the boss of the level, you will automatically be transported to the bug toss mini game. This feature was taken out of the edited version of the game.
 - lxi There are about two or three different box variations for Hummer Team's Super Mario World.
 - lxii Super Maruo is credited as being the first unlicensed Famicom game to have ever been created. The game is explicit in nature, featuring 8-bit penetration, and is extremely hard to find. To make matters even more tricky, this game has been "reproduced" a few times, making it difficult to determine if the version of the game owned is an original or a fake. Proceed with caution if attempting to purchase an original of this game.
 - lxiii A. Chudov's Text Editor is not a game. It is simply a text editor for the Famicom, most likely designed for use with a Famiclone keyboard. Although I feel the software doesn't exactly fit in on the main unlicensed list, it doesn't perfectly fit in with the educational software either, so I've decided to keep the game on the main list with the rest of Chudov's programs.
 - lxiv Two versions of The Ultimate Stuntman exist, each bearing different label art. Like other BIC / Realtec games, this artwork variation could have something to do with different publisher releases.
 - lxv This list is based off of the list on the Bootleg Games Wiki, found at the following link:

http://bootleggames.wikia.com/wiki/Shenzhen_Nanjing_Technology_Co.,_Ltd.

The list provided in this document has been tweaked a bit though, to make the list more accessible for non-Chinese speakers.

lxvi The information provided here is courtesy of CaH4e3's page, as seen below:

<http://cah4e3.shedevr.org.ru/bonza.php>

- lxvii Thus far, Pyramid is the only Spica-published Sachen game that has not been found with a special Spica label. Although Spica's Pyramid comes in a Sachen-branded box, the game cartridge itself looks identical to the normal Sachen release.
- lxviii This game is rumored to exist as a FDS to cartridge conversion. I have thus far been unable to confirm its existence though.
- lxix This game is rumored to exist as a FDS to cartridge conversion. I have thus far been unable to confirm its existence though.
- lxx This game is rumored to exist as a FDS to cartridge conversion. I have thus far been unable to confirm its existence though.
- lxxi This game is rumored to exist as a FDS to cartridge conversion. I have thus far been unable to confirm its existence though.
- lxxii This game is rumored to exist as a FDS to cartridge conversion. I have thus far been unable to confirm its existence though.
- lxxiii This game is rumored to exist as a FDS to cartridge conversion. I have thus far been unable to confirm its existence though.
- lxxiv As with several of the other Kemco Disney games, Bugs Bunny Crazy Castle originally started out as Roger Rabbit, a Famicom Disk System game. Kemco released the game with Bugs replacing Roger Rabbit for its Western release, and the pirates eventually brought that game back to the Famicom.
- lxxv Joe & Mac was released on Famicom in a normal, unhacked version, as well as under the name "Mario 16", a hacked version of Joe & Mac where the main character is replaced by Mario.
- lxxvi Kid Klown was released in Japan as Mickey Mouse III: Yume Fuusen. Due to not owning the copyright to the Disney characters in the States, Kemco reskinned the game for a Stateside release.
- lxxvii This game was released on Famicom in a normal, unhacked version, as well as under the name "M.C. Mario", a hacked version of M.C. Kids where the main character was replaced by Mario.
- lxxviii A hacked version of this game exists, known as "Batman & Flash". In this version of the game, Batman replaces the protagonist.
- lxxix Power Blade was "sort of" released on the Famicom officially. The game that the West received is a heavily modified and "upgraded" version of the Japanese game, Power Blazer. The pirates brought this (superior) version of the game to the Famicom.
- lxxx As with Kid Klown, Snoopy's Silly Sports Spectacular originally started out as Donald Duck. Once again, Kemco modified the game for its Western release, and pirates eventually brought the modified version back to the Famicom.
- lxxxi This game exists as two versions. There is an unhacked version of Talespin, as well as Rosso Porco, a title screen hack of the game, which was inspired by an obscure cartoon.
- lxxxii Yo! Noid is the Western release of the Famicom game Kamen no Ninja Hanamaru. The game was then reskinned and became Yo! Noid for its debut in the west.
- lxxxiii I am uncertain as to whether this is a legit Famiclone cartridge from back in the day or a modern-made one; however, at the moment I am leaning towards it being a non-modern cart. If I can confirm otherwise at a later date, then this entry will be removed from the list.
- lxxxiv I am uncertain as to whether this is a legit Famiclone cartridge from back in the day or a modern-made one; however, at the moment I am leaning towards it being a non-modern cart. If I can confirm otherwise at a later date, then this entry will be removed from the list.
- lxxxv Angry Birds 4 is also sometimes found under the name Angry Birds 2. This hack of Kiwi Kraze has both English and Russian translations. So far, the English versions seem to be on the multicarts, whereas the single cartridge versions contain the Russian-language edition of the game.
- lxxxvi Two versions of this hack exist; one has a copyright date of 1995, and the other a copyright date of 1996.
- lxxxvii Akū Senki Raijin was only available through the Famicom Disk Writer service.
- lxxxviii Like Greek Roman Wrestle below, it seems that Curotsukusu is just a reoccurring error on Famicom Disk game lists. I have thus far found no evidence of the game's existence, unless it was released under a different title / romanization scheme and I failed to recognize it.

- lxxxix Eggerland: Sōzōhe no Tabidachi was only available through the Famicom Disk Writer service.
- xc Evidence suggests that Greek Roman Wrestle is nothing more than a database error. Although the game appears one on or two Famicom Disk game lists, the ID Code provided matches up with Smash Ping Pong, a different game on the Famicom Disk system. Furthermore, the ID Code does not match the type of code that Jaleco would have used.
- xcI Ishido: The Way of Stones was only available through the Famicom Disk Writer service.
- xcii Kaettekita Mario Bros. was only available through the Famicom Disk Writer service.
- xciii Lutter was only available through the Famicom Disk Writer service.
- xciv Moonball Magic was only available through the Famicom Disk Writer service.
- xcv Puyo Puyo. was only available through the Famicom Disk Writer service.
- xcvi SD Gundam World: Gachapon Senshi Scramble Wars Map Collection was exclusive for Famicom Disk Writer.
